Some aspects related to the implementation of MSFD in Romania

Counselor dr. Otilia Mihail
Department on Water, Forest and Fisheries
Ministry of Environment and Climate Changes
PMA AG Meeting, Istanbul 2.10.2014
State of play I

Transposition

Implementation:
- initial assessment (art.8)
- Determination of GES (art.9)
- Set up the environmental targets (art. 10)
- Reporting – written national report (15 July 2012)
  – sheets – (15 October 2012)
National integrated monitoring programme is addressing coastal, transitional, and marine waters.

Number of stations – 71
Map of sampling stations
Gaps

- Missing data for D1, D2, D3, D4, D6, D7, D10, D11
- Missing methods to identify the features of some descriptors
- Wrong interpretation
Monitoring programme (art. 11)

- Increase the number of stations for marine and open sea waters,

- Review of GES values for some descriptors taken into consideration new data,

- Monitoring of structure and composition of marine sediments,
Monitoring programme (art.11)

- Increase the number of biological components of marine ecosystem (macroalgae, zooplankton, fish populations, dolphins, sea birds, non-indigenous species)

- Data collection for marine litter

- Initiate monitoring for noise and energy
THANK YOU FOR YOUR ATTENTION!
